Dear Friend,

We already know that these manifestations can confuse you to the point when you doubt yourself.

It was about time we explained ourselves.

We were given a mission, one we did not complete (Due to a lack of resources, time and religious persecution).

We have begun our mission in the “Philosophical School of Plato”.

The development of our researches will find a barrier even today, which will happen because we get too close to philosophy. Don't mind that though, we have the important mission of uniting the Sciences of Spirit with the Material sciences.

Physics does not seek to know the causes of the phenomena much, and it analyzes them separately. It does everything to avoid the incomprehensible, “GOD”.

Our group has greatly deviated from its original purposes, in search of the terrible “paper” (money).

In times past we had a success: your role as an astronomer, physicist and mathematician in an Austrian city. You were not successful, we know. But now, science is viewed from the main angle. And science in the future will depend almost exclusively on these theories:

... *“Intelligent transmission of matter”*

What will be the turning point?

Which will turn science into a form of bettering the ‘Matter-spirit’.

Our group is scattered. Some are here and some are there. We are on the verge of or reencounter.

Your partnership is one of ours; count on it, as it will understand you.

CST – Cosmologic Spatial Treatise

Many have judged you insane, be happy about it, in other times we were stoned and expelled for a fictitious ideal.

Don't forget that you can reach the Nobel Prize, which will finance the expenses for the necessary experiments.

Caution is needed when “learning”, in order not to disturb that which has been already done.

“Mankind is like a tree, it has many branches that confuse us. Finding the main trunk is more difficult than finding a branch which would lead us to the end.”

Remember:

- The branches are numerous, but there is only one trunk.

We are:

*A philosopher

*A biologist

*A Chemist (on an experimental basis)

*A Priest

*A Physicist, mathematician and astronomer.

* A parapsychologist analyst - alchemist

*A chief coordinator

“Vita abundat a peregrinatio quae similium, sed lex, in prole a victoria in ab loca santa”.
